EXAMPLE: JULY 14, 1916									
Divide the year 1916 by 700. The remainder is 516.									
Under heading "The years till seven hundred" find the year 516. On the horizontal									
line on which this year ap-									
pears, find under heading									
"First weekday of months"									
the first weekday of July,									
which is No. 6 (Saturday).									
Under heading "First and									
following weekdays" find in									
first column the No. 6 and									
under heading "Dates of the									
month" find No. 14. Where									
No. 6 and No. 14 meet at a									
right angle, that was the									
weekday No. 5 (Friday) on									
which July 14, 1916 fell.									

as well as in fact.

weeks in the quar-  
verlapping the di-  
visions of the years and quarters in a  
different way each time, thus complicat-  
ing all comparisons, statistics and ac-  
counts.

- (e) The intercalary day of leap year is now  
credited to February once in 4 years,  
thus making monthly computations and  
comparisons even more complex.

The seven days of the week.—No. 1 is Monday, No. 2 is Tuesday, No. 3 is Wednesday, No. 4 is Thursday, No. 5 is Friday, No. 6 is Saturday, No. 7 is Sunday.

and from then on I thought that came my  
might promote it. But when Mr. George East-  
man of the Eastman Kodak Company began pub-  
lizing "The 13-month Calendar," I thought he  
could surely succeed in having that plan  
adopted. When I showed THE PERPETUAL  
CALENDAR to my M.I.T. professors, they hesi-  
tated to endorse it, for M.I.T. at that time  
was receiving large gifts of money from Mr.

have considered the unnecessary irregularities  
of the calendar now in use are in favor of  
calendar reform. In THE PERPETUAL CALEN-  
DAR holidays and anniversaries always fall on  
the same day of the week, year after year.  
The practice of starting each week on Monday  
agrees with common business procedure, and it  
allows Saturday and Sunday to become "the
